English	Mastery or proficiency (C2)
German	Threshold or intermediate (B1)
Mandarin	Waystage or elementary (A2)

**Academic Achievements**

Subject	Degree
Strategic IT Management	Master's
Computer & Systems Sciences	Bachelor

**Current Occupation**

The title of IT Portfolio Controller currently covers four roles at the Service & Project Management Office of Skanska IT Nordic - Project Portfolio Manager (PPM), Service Catalog Manager (SCM), Service Level Manager (SLM) and Demand Manager (DM). Within these, I am responsible for managing policies, processes and their inherent activities being followed, as well as compiling aggregated status reports for the different decision forums. The project portfolio contains some 75 parallel initiatives from Sweden, Finland and Norway - some of which have a Nordic or Global scope. The Service Catalog houses between around 200 customer-facing services, again with varying regional delivery and support scope. I'm also currently managing the implementation of our new Management System, and supporting Skanska's Global IT Strategy Program as Program Coordinator.
