

To whom it may concern

Fredrik Rusch completed the course work “Research Methodology and Scientific Writing” under my supervision in the Winter 2012. I was also the reviewer of his mater thesis, titled “Strategic Alignment of Flexible Work” in the Spring 2013. During that time, I have gotten to know Fredrik quite well and can thoroughly vouch for his talents and skills.

Fredrik is a very talent student. He is hardworking, productive and persistent for excellent performance. He has formulated an innovative idea of studying strategic alignment of flexible work, conducted a deep case study, and performed an excellent and logical analysis of the case for his master thesis. The results have the highest quality and magnitude that there are a few equal at the same level.

With his relentless motivation and his knowledge of strategic IT management, Fredrik would bring a wealth of knowledge and skills to your organization. If you have any questions, feel free to contact me.

Sincerely yours,

2013-6-24, Kista, Sweden
